

About Us

Livora Concept was founded with a simple belief: that beautiful spaces should also be functional ones. We import premium acoustic wall panels handpicked for their quality, finish, and performance and bring them to the Greek market at prices that make genuine quality accessible.

Our panels combine technical precision with timeless aesthetics, making them ideal for homes, offices, hotels, restaurants, and retail spaces. Whether you're an architect, interior designer, or a homeowner who simply wants better walls Livora is for you.

Oak

The timeless classic.

The Oak panel brings warmth and natural elegance to any interior. Its wood grain finish pairs beautifully with both contemporary and traditional design, making it one of our most versatile options. Whether used as a feature wall or across an entire room, Oak creates a welcoming atmosphere without sacrificing acoustic performance.

Technical Specification	
Finish	Technical Veneer 1-side covered
Core	Black HDF slats
Backing	Black PET polyester fiber 1,350 g/sq.m
Panel Size	600 x 2,400 x 21 mm
Coverage per panel	1.44 sq.m
Slat Profile	27 mm salt / 13 mm gap
Fire Performance	Flame-retardant (B1 grade)
water Resistance	Moisture-proof
Cleaning	Dry cloth or vacuum — do not use water
Installation	Screws or mounting adhesive
Certification	CE Mark

Price

34.90 € / sq.m (VAT included)

Oak

Teak

Exotic warmth, refined finish.

Teak is a statement. With its rich, goldenbrown tones and distinctive grain, the Teak panel channels the warmth of tropical hardwood without the environmental cost. A perfect choice for living rooms, lobbies, or any space where you want to make a lasting impression.

Technical Specifications	
Finish	Technical Veneer 1-side covered
Core	Black HDF slats
Backing	Black PET polyester fiber 1,350 g/sq.m
Panel Size	600 x 2,400 x 21 mm

Slat Profile	27 mm salt / 13 mm gap
Fire Performance	Flame-retardant (B1 grade)
water Resistance	Moisture-proof
Cleaning	Dry cloth or vacuum — do not use water
Installation	Screws or mounting adhesive
Certification	CE Mark

Price

34.90 € / sq.m (VAT included)

Black Walnut

Bold. Grounded. Unforgettable.

Black Walnut brings depth and drama to interior spaces. Its deep, smoky grain adds a sense of luxury and intimacy ideal for premium bedrooms, executive offices, or high-end hospitality environments. This is the panel that makes a room feel intentional.

Technical Specifications

Finish	Technical Veneer 1-side covered

Built to Perform

General Specifications	
Panel dimensions	Yellow HDF slats
Coverage per panel	1.44 sq.m
Base material	HDF Board + PET Polyester Fiber
Finish options	Technical Veneer (Oak, Teak, Black Walnut) PVC (Mint)
Fire performance	Flame-retardant — B1 grade
Water resistance	Moisture-proof
Formaldehyde emission	E1 class — SGS tested
Certification	CE Mark
Eco certification	FSC — Forest Stewardship Council
Cleaning	Dry cloth or vacuum — never wet clean

Key Advantages

- NOISE REDUCTION Sound absorbing PET felt mitigates noise and reduces unwanted reverberation
- FLAME RETARDANT Acoustic felt achieves B1 grade flame retardancy
- ECO-FRIENDLY FSC-certified wood sourcing; E1 formaldehyde class
- DIVERSE DESIGN Available in multiple finishes to suit any interior style

Installation Guide Step by Step:

- 1 Prepare the surface**
Ensure the wall is clean, dry, and flat. No specialist preparation is required for standard plaster or drywall surfaces.
- 2 Measure and plan**
Map out your panel layout before starting. Panels are 60 cm wide and 240 cm tall plan your wall width accordingly to minimise off-cuts.
- 3 Fix the panels**
Apply appropriate wall mounting adhesive evenly to the back of each panel, or secure using screws through the panel backing into the wall. Both methods are suitable.
- 4 Join panels**
Butt panels edge-to-edge for a continuous slatted look across the wall. Maintain consistent alignment as you work across the surface.
- 5 Finish the edges**
Use matching trim profiles at wall ends, corners, and ceiling/floor junctions for a clean, professional finish.
- 6 Clean up**
Use a dry cloth or vacuum cleaner to remove any dust or debris. Never use water or wet cleaning products on the panel surface.

Let's Build Something Beautiful

Livora Concept brings premium acoustic wall panels to Greece at prices that make quality accessible. Whether you're furnishing a single room or specifying for a full project, we're here to help.
